ABSTRACT

The data on earned degrees conferred in the aggregate United States are based on one survey instrument from the tenth annual Higher Education General Information Survey (HEGIS) conducted by the National Center for Education Statistics (NCES). This instrument, "Degrees and Other Formal Awards Conferred," covered the period July 1, 1974, to June 30, 1975. The tables in this report provide data on baccalaureate and higher degrees. Tables show numbers of degrees granted by level of degree, institutional control and type, sex of recipient, state, and disciplines division and specialty. Data on awards below the baccalaureate level are to be presented in a separate report. The information presented in the study provides a benchmark for reporting the pool of trained manpower available in discipline specialties, by level of training, and for eight selected professions. This information is required by a number of legislative and executive agencies at the state and federal levels. (JMF)

Earned Degrees Conferred 1974-75

Summary Data

U.S. DEPARTMENT OF HEALTH, EDUCATION & WELFARE
NATIONAL INSTITUTE OF EDUCATION

THIS DOCUMENT HAS BEEN REPRODUCED EXACTLY AS RECEIVED FROM THE PERSON OR ORGANIZATION ORIGINATING IT. POINTS OF VIEW OR OPINIONS STATED DO NOT NECESSARILY REPRESENT OFFICIAL NATIONAL INSTITUTE OF EDUCATION POSITION OR POLICY

HIGHLIGHTS

1. The total number of bachelor's and higher degrees conferred (1,315,659) was 0.4 percent lower in 1974-75 than the previous year's total (1,320,739 in 1973-74), the first such decline since 1954-55.

2. The total number of institutional units conferring bachelor's and higher degrees amounted to 1,819, an increase of 0.6 percent over 1973-74.

3. The percentages of all bachelor's and higher degrees conferred by *publicly* controlled institutional units (as a percentage of total public and private combined):

All degrees–remained at 67 percent.
Bachelor's–remained at 69 percent.
First-professional–remained at 43 percent.
Master's–declined from 67 to 66 percent.
Doctor's–rose from 64 to 65 percent.

4. The percentage of all bachelor's and higher degrees awarded to women continued to increase for each level from 1973-74 to 1974-75:

Bachelor's–44 to 45 percent.
First-professional–10 to 13 percent.
Master's–43 to 45 percent.
Doctor's–19 to 21 percent.

5. The three largest discipline divisions were the same in 1974-75 as in 1972-73 and 1973-74:

Bachelor's degrees–440,997 or 47 percent awarded in education, social sciences, and business and management.
Master's degrees–17,325 or 59 percent awarded in education, business and management, and social sciences.
Doctor's degrees–15,280 or 45 percent awarded in education, social sciences, and physical sciences.

6. In terms of discipline specialties, the highest number of degrees awarded were in:

Elementary education–at the bachelor's and master's levels.
Law–at the first-professional level.
Psychology, general–at the doctor's level.

Except for the doctor's level, the same discipline specialty at each level has been ranked first in each annual survey report since 1964-65. Until this year, chemistry had always ranked first at the doctor's level.

FOREWORD

The data in this publication on earned degrees conferred in the aggregate United States are based on one survey instrument from the tenth annual Higher Education General Information Survey (HEGIS) conducted by the National Center for Education Statistics (NCES). This instrument, "Degrees and Other Formal Awards Conferred," covered the period July 1, 1974, to June 30, 1975.

The tables in this report provide data on baccalaureate and higher degrees. Detail tables show numbers of degrees granted by level of degree, institutional control and type, sex of recipient, State, and discipline division and specialty. Data on awards below the baccalaureate level are to be presented in a separate report, soon to be published, entitled *Associate Degrees and Other Formal Awards Below the Baccalaureate, 1974-75, Summary Data.*

The cooperation of the college and university officials who supplied the institutional reports has made possible a response rate of nearly 100 percent. Only one institutional unit was unable to supply the necessary information. The continued efforts and interest of the survey respondents and the State coordinators are deeply appreciated.

Marjorie O. Chandler, Acting Director
Division of Postsecondary and
Vocational Education Statistics

Paul F. Mertins

and Studies Branch

ACKNOWLEDGMENTS

Reports based on various portions of the Higher Education General Information Survey (HEGIS) were made possible by the cooperative endeavors of many individuals in the National Center for Education Statistics (NCES). For the present report, the following individuals made contributions of particular note:

Geneva C. Davis, statistical assistant, maintained the control logs and did much of the checking of tables; Linda D. Barry and Mary A. Gilbert were the typists who drafted the manuscript into readable form for review and editing.

107.--Intermediate degrees conferred in institutions of higher education, by type of award and control and level of institution: Aggregate United States, 1974-75 24

PURPOSE OF THE SURVEY

Earned Degrees Conferred reports one widely used measure of output of higher education at a specific point in time. The survey includes all degrees granted (except honorary) by all institutions in the aggregate United States that are identified as degree granting by the *Education Directory, Higher Education.* This information provides a benchmark for reporting the pool of trained manpower available in discipline specialties, by level of training, and for eight selected professions. This information is required by a number of agencies of the legislative and executive branches of government at the State and Federal levels. The data are also requested by accrediting agencies, professional organizations, and a number of individual institutions interested in conducting comparative studies.

This edition of *Earned Degrees Conferred* continues the series of annual reports providing data on the distribution of earned degrees in the aggregate United States. This report covers the tenth year in the HEGIS survey series, and is the fourth report to use the taxonomy adopted in 1970-71 for the sixth HEGIS. All data for the 5 survey years (1970-71 through 1974-75) are thus directly comparable. As such, the publication provides the data for studies of trends in the numbers of degrees being granted in the various discipline specialities, as well as distributions by sex, geographic area, and type of institution. This information is of value to discipline-oriented professional associations, accrediting groups, government agencies which provide funding for various disciplines, and researchers and planners in postsecondary education.

SURVEY ORGANIZATION AND METHODOLOGY

DEGREE DEFINITIONS

The survey requests data for higher education degrees which are defined as follows:

Bachelor's—requires successful completion of at least 4 but not more than 5 years of academic work beyond high school. Includes degrees conferred in cooperative work-study plans which provide for alternate class attendance and employment in business, industry, or government.

Master's—requires successful completion of at least 1 year and sometimes 2 years of work beyond the bachelor's degree. Includes the degree of Education Specialist.

Doctor's—Includes such degrees as Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and Ph.D. degrees in any field.

Other Degree or Certificate—requires completion of a program intermediate between the master's and doctor's degrees which is recognized by the awarding of a degree or certificate.

First-Professional Degree—a degree that (a) signifies completion of the academic requirements to begin practice in the profession, (b) is based on a program which requires at least 2 years of college work prior to entrance, and (c) requires a total of at least 6 academic years of college work, including prior required college work plus the length of the professional curriculum.

SURVEY UNIVERSE

This report is based on data furnished by 1,819 institutional units. These constitute all of the institutional units in the National Center for Education Statistics' universe that could be identified as offering bachelor's or higher degrees during the period July 1, 1974, to June 30, 1975. The survey universe is based on the list of institutional units included in the *Education Directory, 1973-74, Higher Education* (HEW Publication No. (OE) 74-11404) with such

changes as were known to NCES in fall 1974. The number of institutional units included in the 1974-75 survey of earned degrees, by level and control, are:

Level of institutional unit	Total	Control	
		Public	Private
All institutional units	1,819	545	1,274
Universities	161	96	65
Other 4-year	1,658	449	1,209

In addition to these 1,819 institutional units, there were 46 other units that, although offering instruction at the bachelor's or higher level, were classified as non-degree granting. They were not surveyed for degree data.

MAJOR CLASSIFICATIONS OF DATA

Type of Control–Institutional units were identified as "public" or "private" according to their classification in the *Education Directory, Higher Education.*

Types of Institutions–Selected tables in the report group institutional units into two categories: "universities" and "other 4-year institutions." Classified as universities are units that give considerable stress to graduate instruction, confer advanced as well as bachelor's degrees in a variety of liberal arts fields, and have at least two professional schools that are not exclusively technological. Other units offering 4 or more years of college-level work, but not meeting the criteria for classification as universities, make up the "other 4-year" category.

The method of aggregating institutions by type, in the detail tables of this report, differs from that used in previous reports. Please see appendix A for an explanation of the differences.

Discipline Speciality (major field of study)–The classification of discipline specialities relies on *A Taxonomy of Instructional Programs in Higher Education.** This was adopted by HEGIS in 1970 and is maintained to provide comparability of data on a continuing basis.

*U.S. Department of Health, Education and Welfare, Office of Education, National Center for Education Statistics. *A Taxonomy of Instructional Programs in Higher Education*, by Robert A. Huff and Marjorie O. Chandler, OE-50064-70. Washington, D.C.: U.S. Government Printing Office, 1970.

DATA COLLECTION

A copy of the survey form and accompanying instructions and definitions (see appendix B) was addressed to the president of each institutional unit listed in the survey universe or, in more than one-half of the States, to a State coordinator who supplied the data from information submitted by the institutional units or coordinated the data collection with all or selected institutional units in the State. Followup letters and phone calls were made to State coordinators or institutional officials who had not reported the data within a reasonable period of time after the due date of August 15, 1975.

DATA VERIFICATION

Three methods were utilized to verify the reasonableness of data submitted by each institutional unit:

1. A computer check providing a field-by-field comparison with the data submitted for the previous year was made. The check was made to determine whether the data varied by more than a predetermined percentage from the previous year's submission. The acceptable difference was based on the order of magnitude of the data field size: the greater the number of degrees, the lower the percentage of difference permitted.
2. Survey forms containing data items rejected by the computer check were examined visually by survey personnel to determine whether footnotes, explanatory notes, or readily recognizable human errors accounted for the apparent discrepancies. Where necessary, catalogs of the institutions were consulted for institutional offerings.
3. Finally, the remaining discrepancies were resolved by correspondence or telephone contact with State coordinators and institutional representatives.

Internal checks for consistency included the checking of accumulated totals against subtotals obtained from appropriate subsets of the data.

DATA IMPUTATION

Degree data for one institutional unit had to be imputed. It was an "other 4-year" unit which had closed, and its records were inaccessible. The total number of degrees awarded was imputed from the data received in *Opening Fall Enrollment, Fall 1974.* The distribution of degrees by field was imputed from this total and from the distribution of degrees awarded in 1973-74 by that institutional unit. Only 57 bachelor's degrees were involved, which was 0.7 percent of all bachelor's degrees awarded in the State and 0.006 percent of all bachelor's awarded in the Nation.

CURRENT DATA AND RECENT TRENDS

This section of the report attempts to highlight some of the basic changes in distribution of degrees conferred that have occurred in the past few years. It attempts to emphasize rather than exhaustively analyze some of the changes and nonchanges that may indicate possibilities in the future. A separate publication, *Earned Degrees Conferred: Analysis of Trends, 1965-66 Through 1974-75*, is now in process.

TOTAL NUMBERS OF DEGREES

Table 1 shows the percent change in the number of degrees conferred by level of degree and sex of recipient. During the period 1969-70 to 1974-75, there were dramatic increases in the percentage of women receiving degrees at all levels (as illustrated in chart 1). However, the high rates of increase for doctor's and first-professional degrees did not bring women into anything approaching parity with men. In 1969-70 women received a very small proportion of doctor's and first-professional degrees. After 5 years of rapid increases, women were approaching parity with men at only the bachelor's and master's levels (as shown in chart 2). A continuation of these trends would bring about a 60-percent men/40-percent women distribution of doctor's degrees in 1981-82 and of first-professional in 1978-79.

Chart 1.--Degrees awarded in 1974-75, percent change over 1969-70

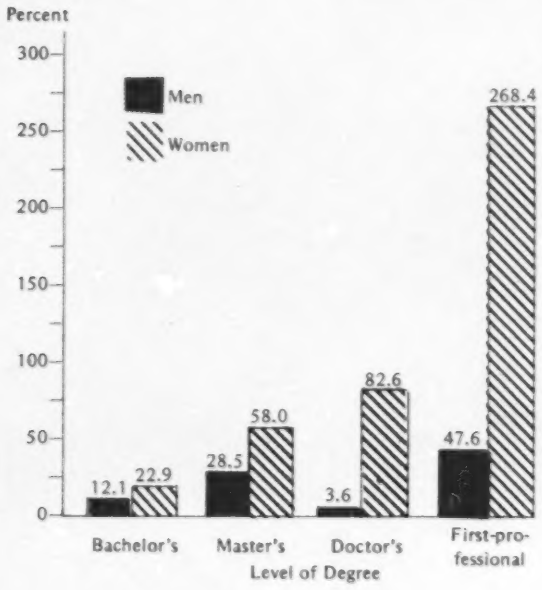

Chart 2.--Percentage of degrees awarded, by sex of recipient and level of degree, 1974-75

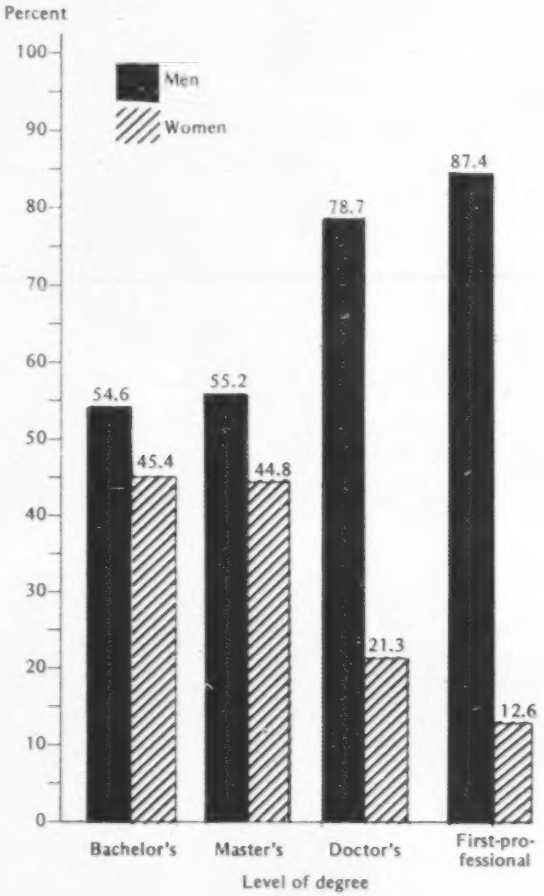


Such trends, contemplating 49,000 doctor's degrees and 100,000 first-professional degrees by the years indicated, appear completely unrealistic.

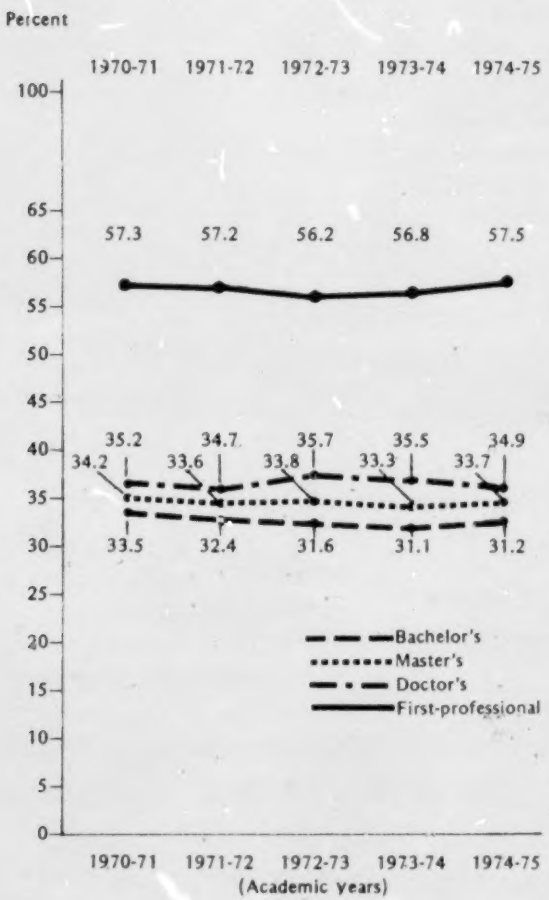
This means that without increases in spaces, competition for admission may continue to increase, and may result in a decline in the number of men receiving first-professional degrees in some specialties.

DEGREES AWARDED BY CONTROL OF INSTITUTIONAL UNIT

Predictions have been made at various times of the eventual disappearance of the private sector of higher

education. Whatever effect the current financial problems may eventually have, recent indications are that private colleges and universities will continue to provide a significant proportion of the graduates from higher education programs for the forseeable future. Chart 3 illustrates how little change has occurred during the past few years in the percentage of degrees awarded by these institutional units.

Chart 3.–Percentage of degrees awarded by private institutional units, by level of degree, 1970-71 to 1974-75



THE DECLINE IN THE NUMBER OF DEGREES CONFERRED

The number of bachelor's degrees conferred was lower in 1974-75 than in 1973-74, as compared to the numbers of all other degrees (master's, doctor's, and first-professional), which were higher in 1974-75 than in 1973-74. This decline in the number of bachelor's degrees, the first since the drop in 1954-55 from 1953-54, was due primarily to a drop in the number of new students in fall 1971.

Table A shows the number of bachelor's degrees awarded in each discipline division in each year from 1970-71 through 1974-75; that the degrees conferred in 1974-75 were less than those conferred in 1973-74 in 11 discipline divisions; that in 8 of the 11 discipline divisions, fewer bachelor's degrees were awarded in 1974-75 than in 1970-71. In other words, none of the 8 discipline divisions with downward trends during this 5-year period began to recover in 1974-75.

Table B shows the number of master's degrees awarded in each discipline division in each year from 1970-71 through 1974-75. Although the number of master's degrees conferred in 1974-75 was greater than in 1973-74, the number declined in 8 discipline divisions. Except for library science, declines were also recorded in the bachelor's level.

In only 5 discipline divisions was the number of master's degrees in 1974-75 smaller than the number in 1970-71. Each of these also experienced the 1-year decline from 1973-74.

Table C shows the number of doctor's degrees awarded in each discipline division in each year from 1970-71 through 1974-75. In 9 of these divisions, the number of degrees conferred in 1974-75 was smaller than in 1973-74: three of these (biological sciences, communications, and law) were unique to the doctor's degree level. Engineering, foreign languages, letters, mathematics, and physical sciences also experienced declines at both bachelor's and master's levels. Library science also had fewer degrees at the master's level in 1974-75 than in 1973-74.

Five discipline divisions had fewer doctor's degrees awarded in 1974-75 than in 1970-71. Of these only agriculture showed a decline over the 5-year period but not between 1973-74 and 1974-75.

Some long-term shifts in program demands are seemingly being established. Considering the poor job market in education and the employment outlook for graduates in the social sciences, letters, and foreign languages, a continued decline in the number of bachelor's degrees in these fields could certainly be expected.

In engineering, the wide divergence in the demand for engineers over the last decade has provided a special case. It has resulted in variations in freshman admissions so that the changes in the number of degrees conferred may run counter to the changes in job opportunities.

Among the sciences some evidence shows that decreases in the number of advanced degrees conferred has been in part a result of decreased Federal funding.*

Trends in the awarding of advanced degrees in many areas are difficult to anticipate. Some evidence, for instance, shows that a tightening job market may induce more individuals to obtain more education as a hedge against a layoff, pecially where part-time programs are available. This could result in an increase in the number of master's, and to a lesser extent doctor's, degrees awarded as job opportunities decline. Detailed analyses of such situations are not possible here, but NCES welcomes inquiries regarding additional data which might be useful to others in making such analyses.

*See *Graduate Student Support and Manpower Resources in Graduate Science Education*, Surveys of Science Resources Series, National Science Foundation, NSF 73-304.

PRESENTATION AND COMPARABILITY OF THE DATA

TABLES

The seven basic tables in this report for 1974-75 contain what the authors believe to be the most comprehensive and useful groupings of the data within the constraints of publication. The tables are comparable to, and utilize the formats of, reports of previous years.

Table 1 is a brief historical comparison of degrees conferred, by level of degree, for the last 6 years, including the 1974-75 survey year. Table 2 is a summary of the degrees conferred in 1974-75, by level of degree and by control and level of institution. Tables 3, 3A, and 3B show State data for each of the degree levels. Table 4 shows bachelor's, master's, and doctor's degrees awarded, by discipline division. Table 5 shows bachelor's, master's, and doctor's degrees awarded, by discipline specialty within discipline division. Table 6 presents data on first-professional degrees conferred in eight selected discipline specialties. Table 7 summarizes intermediate degrees conferred during the survey year, by level and control of institution.

In addition to the tables, the facsimile form in appendix B provides data for each cell reflecting totals for the aggregate United States. These data are summarized in tables 5 and 6.

COMPARABILITY

Tables 1 and 3 through 6 in this report are comparable to tables 1 and 3 through 6 in the publications for 1970-71, 1971-72, 1972-73 and 1973-74. Table 2 is comparable to table 102 in the report covering 1972-73 and 1973-74. Table 7 in this report is comparable to table 7 in the 1972-73 and 1973-74 report. It is also similar to table 10 in the publications for 1970-71 and 1971-72, although the current table provides greater detail.

In 1972 NCES began aggregating data by a method that groups institutional units by their level regardless of whether they are independent units or branches. This method was first used in the appendix tables of *Earned Degrees Conferred, 1972-73 and 1973-74, Summary Data.* The method is used in the main tables for the first time in this publication. This means that table 2 is comparable to table 102 in the report for 1972-73 and 1973-74, but there are no comparable tables in earlier reports. (See appendix A for a fuller explanation of the differences between the two methods of aggregation and the impact of changing from one method to another.)

Comparisons with data prior to 1970-71 must be made with extreme care. The new taxonomy introduced in 1970-71 involved extensive changes. Any such comparisons should only be made by using the "translation table" contained in the taxonomy.

Tables showing the number of degrees conferred, by discipline division and specialty and by institution, for 1974-75 are being published in a separate edition, available only on request as long as the limited supply lasts, by writing to:

1/ AN INTERMEDIATE DEGREE IS ANY RECOGNITION (DEGREE OR CERTIFICATE) FOR A PROGRAM INTERMEDIATE BETWEEN THE MASTER'S DEGREE AND THE DOCTOR'S DEGREE (PH.D., ED.D., ETC.), WHICH IN ESSENCE IS THE DOCTOR'S DEGREE WITHOUT THE DISSERTATION. FOR EXAMPLE, MASTER OF PHILOSOPHY, CANDIDATE IN PHILOSOPHY, DOCTOR OF ARTS, ETC.

APPENDIXES

A. AN ALTERNATE METHOD OF AGGREGATION

B. REPRODUCTION OF SURVEY FORM, PARTS A AND B

Appendix A

AN ALTERNATE METHOD OF AGGREGATION

The National Center for Education Statistics (NCES) has become aware, over the years, of the trend toward increasing numbers of multicampus institutions and entire systems of institutions in which various units offer programs at different levels. It has become necessary to identify the level of program in each of the units separately, instead of following the traditional practice of a single identification for an entire conglomerate of units. There is also an increasing need for analysis of operations of individual units and for the ability to make interinstitutional comparisons, by level of institutional unit. Such comparisons require that the groups be homogeneous.

Beginning with the year 1971-72 NCES began classifying the constituent units of all multicampus and multi-institutional entities separately. This classification made it possible, and mandatory by fall 1972, that the separate entities be surveyed individually. This is the third year in which data on "Degrees and Other Formal Awards Conferred" have been collected in such a manner. Aggregations by the "new" method were first published for the 1972-73 survey year.

Each individual campus (institutional unit) is now coded in one of six ways:

Code 1– University (including only those branches classified at the university level);

Code 2–Other 4-year institution (including only those branches classified at the other 4-year level);

Code 3–2-year institution (including only its own branches);

Code 4–4-year branch of a university;

Code 5–2-year branch of a university;

Code 6–2-year branch of an "other 4-year" institution.

Using the "old" method of aggregation, the one which is used in the appendix tables in this publication, institutional units aggregate as follows:

University = 1 + 4 + 5;

Other 4-year = 2 + 6;

2-year = 3.

The "new" method of aggregation, used in detail tables, is as follows:

University = 1;

Other 4-year = 2 + 4;

2-year = 3 + 5 + 6.

Because this publication deals with degrees at the baccalaureate level and above, certain categories of institutional units do not appear. Codes 3, 5, and 6 all relate to 2-year institutions or 2-year branches of universities or other 4-year institutions.

The general impact of the new method of aggregation is to reduce the number of students shown as receiving degrees from universities and to increase the number of degrees awarded by "other 4-year institutions." The following tabulation shows the number of degrees moved from the "university" level to the "other 4-year" level by adopting the new method of aggregation of institutional units for 1974-75. It illustrates the impact on each degree level in the survey year of changing the method of aggregation.

Level and control	Number
Bachelor's	52,243
Public	49,903
Private	2,340
Master's	14,616
Public	11,986
Private	2,630
Doctor's	1,631
Public	1,386
Private	245
First-professional	5,061
Public	4,963
Private	98

Tables 2 and 7 in the body of the report are the only tables in this publication affected by this

change. To simplify comparisons between the two methods of aggregation, a numbering system is used which is consistent. In this publication the table which is aggregated by the "old" method has 100 added to the number used for the table aggregating the same data by the "new" method. Thus, table 2 and 7 can be compared directly with tables 102 and 107 in this appendix.

1/ AN INTERMEDIATE DEGREE IS ANY RECOGNITION (DEGREE OR CERTIFICATE) FOR A PROGRAM INTERMEDIATE BETWEEN THE MASTER'S DEGREE AND THE DOCTOR'S DEGREE (PH.D., ED.D., ETC.), WHICH IN ESSENCE IS THE DOCTOR'S DEGREE WITHOUT THE DISSERTATION. FOR EXAMPLE, MASTER OF PHILOSOPHY, CANDIDATE IN PHILOSOPHY, DOCTOR OF ARTS, ETC.

Appendix B—REPRODUCTION OF SURVEY FORM, PARTS A AND B

[Data shown on the form are for the aggregate United States]

NAME OF INSTITUTION	1. INSTITUTION CODE NUMBER

INSTRUCTIONS FOR PART A: FIRST-PROFESSIONAL DEGREES CONFERRED IN SELECTED FIELDS, 1974-1978

Only the 8 professions listed below should be reported in Part A. Within these professions, report **first-professional** degrees only. A first-professional degree is defined herein as one which meets all three of the following criteria: (1) it signifies completion of the academic requirements to begin practice in the profession; (2) it is based on a program which requires at least 2 years of college work prior to entrance; and (3) a total of at least 6 academic years of college work is required to complete the degree program, including prior required college work plus the length of the professional curriculum itself.

The "Other" category is to be used only in the event that there are first-professional degrees within the 8 professions other than those specifically named in connection with those professions.

For each of the 8 disciplines, degrees other than first-professional are to be reported in Part B.

The TOTAL line (line 14) should show the sums of all entries in columns 4 and 5.

PART A: FIRST-PROFESSIONAL DEGREES CONFERRED IN SELECTED FIELDS *(Requiring at least six years of study)*

IS PART A APPLICABLE TO YOUR INSTITUTION? ☐ YES ☐ NO
(If not applicable, proceed to Parts B and C.)

CODE	DISCIPLINE SPECIALTY *(major field of study)*	LINE NO. *(Circle if new this year)*	NUMBER OF FIRST-PROFESSIONAL DEGREES CONFERRED

PART B — BACHELOR'S, MASTER'S, AND DOCTOR'S DEGREES, 1974-75 — Continued

Do you provide any recognition *(degree or certificate)* for a program intermediate between the master's degree and the doctor's degree *(Ph.D., Ed.D., etc.)*, which in essence is the doctor's degree without the dissertation? For example, Master of Philosophy, Candidate in Philosophy, etc. *(Do not include specialist degrees.) (Also, do not include in the tabulated figures for Bachelor's, Master's, and Doctor's degrees.)*

☐ YES ☐ NO If "YES", specify the name(s) of the degree(s) or certificate(s) and the number of students receiving them from July 1, 1974 to June 30, 1975.

CODE (1)	NAME OF DEGREE OR CERTIFICATE (2)	LINE NO. (3)	NO. OF STUDENTS RECEIVING DEGREE OR CERTIFICATE (4)
